

KRITA *for* BEGINNERS

Blade & Quill

A GUIDE TO KRITA'S MOST USED SHORTCUTS

INTRODUCTION

hello!

In this PDF file, you will find the shortcuts most used in Krita.

Please make sure to print this PDF or keep it handy.

You have no idea how many times, I forget about a shortcut!

I hope you will find this guide helpful!

Thank you all for following this channel, and most importantly, thank you for your trust and support!

I am so happy you decided to learn Krita with me.

Corinne

MOSTLY KNOWN

shortcuts

- Click on the letter B to get to the brush tool.
- Click on the letter O to increase the opacity of your brush.
- Click on the letter I to decrease the opacity of your brush.

Please note that each time you hit any of these two letters (depending on what you need to do) the brush opacity will increase or decrease in increments.

- Click on the letter X to swap between the foreground and background colors.
- Click on the letter D to reset your foreground and background colors to black and white.
- Click on the letter E to activate the erase mode of your brush. Click E again to get your brush back to its paint mode.
- Click on the keys Ctrl + U to activate the HSV/HSL adjust menu (This is where you will be able to adjust the hue, saturation, and lightness of your image).

MOSTLY KNOWN *shortcuts*

- Click on the keys Ctrl + Z to undo an action.
- Click on the keys Ctrl + Shift + Z to redo that action.
- Click on the keys Ctrl + Shift + A to deselect.
- Click on the key INSERT to create a paint layer.
- Click on the keys Shift + INSERT to create a vector layer.
- Click on the letter T to activate the move tool.
- Click on the keys Ctrl + T to activate the transform tool.
- Click on F5 and it will open the brush editor.
- Click on F6 and it will open the "*Choose Brush Preset*" menu. This is where you will find all your brushes.
- Click on F1 and it will take you to the manual on Krita's website.
- Click on F2 to rename your layer.
- Click on F3 to get to the "*layer properties*" menu box.

KNOWN *shortcuts*

- Click on the keys Ctrl + shift + U to desaturate an image.
- Click on the keys Ctrl + I to invert a layer.
- Click on the keys Ctrl + Shift + I to invert a selection.
- Click on the keys Ctrl + Shift + J to cut any selection you have made to another layer (above or below).
- Click on the keys Ctrl + E to merge to the layer below.
- Click on the keys Ctrl + Shift + E to flatten your image.
- Click on the letter C to crop
- Click on the letter G and you will be able to draw a gradient.
- Click on the keys Shift + Backspace to fill the layer or a selection you have made with a color you have chosen.
- Click on the letter F and you will be able to fill a layer, a shape, or a selection with a color, gradient, or pattern that you chose.
- Click on the letter P to activate the color picker.

MOSTLY UNKNOWN *shortcuts*

FOR THESE SHORTCUTS TO WORK, YOU MUST FIRST SET UP PRESETS.

- Click on the slash key (/) and it will switch whatever brush you are using to its previous preset.
- Click on the period key and it will take you to your next favorite preset.
- Click on the comma key and it will take you to your previous favorite preset.
- Holding the R key and clicking on a shape (or line) that you drew on the canvas, or clicking on a color you painted, will show you on which layer that color, shape (or line) is located.

OTHERS *shortcuts*

- Holding the **SPACE BAR** down + the **LEFT MOUSE BUTTON** will allow you to move your canvas around the interface.
- Click on the **NUMBER 4** key and the canvas will rotate in increments toward the left.
- Click on the **NUMBER 6** key and the canvas will rotate in increments toward the right.
- Click on the **NUMBER 5** key and the canvas will straighten.
- if you want to quickly zoom in onto your canvas and make it fit your screen, Click on the **NUMBER 2** key.
- if you want to zoom all the way and fit the entire space allocated for your canvas, Click on the **NUMBER 3** key.
- Click on the keys **Ctrl + J** to duplicate a layer.
- Click on the keys **Ctrl + C** to copy anything.
- Click on the keys **Ctrl + V** to paste.
- Click on the keys **Ctrl + A** to select all.
- Click on the keys **Ctrl + L** to activate the levels menu.
- Click on the letter **W** to activate the wrap-around mode.

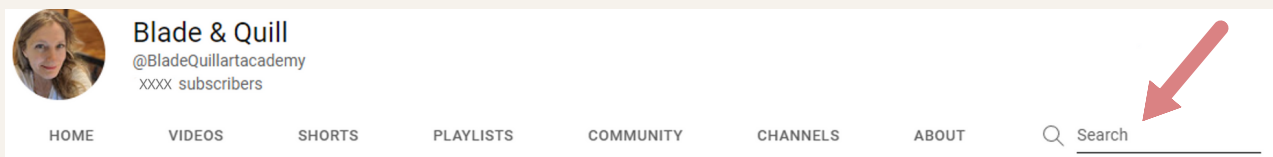

NOTES TO REMEMBER

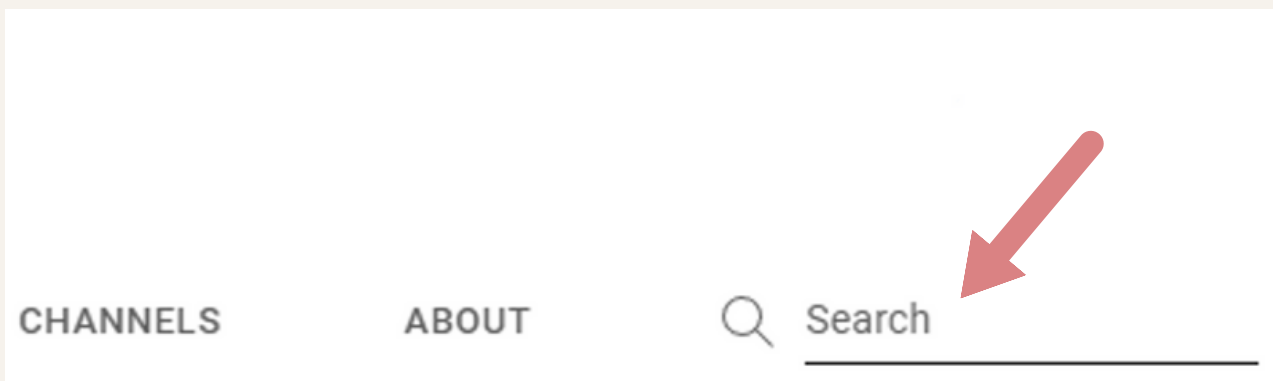

Please keep in mind that you can also create your own shortcuts and you can edit the ones that already exist.

If you have any questions, please feel free to check the channel. All videos I created have chapters and timestamps to help you find what you need.

You can also type keywords in the search bar on the homepage of my channel, as shown by the arrow below, and it will take you to the proper video.

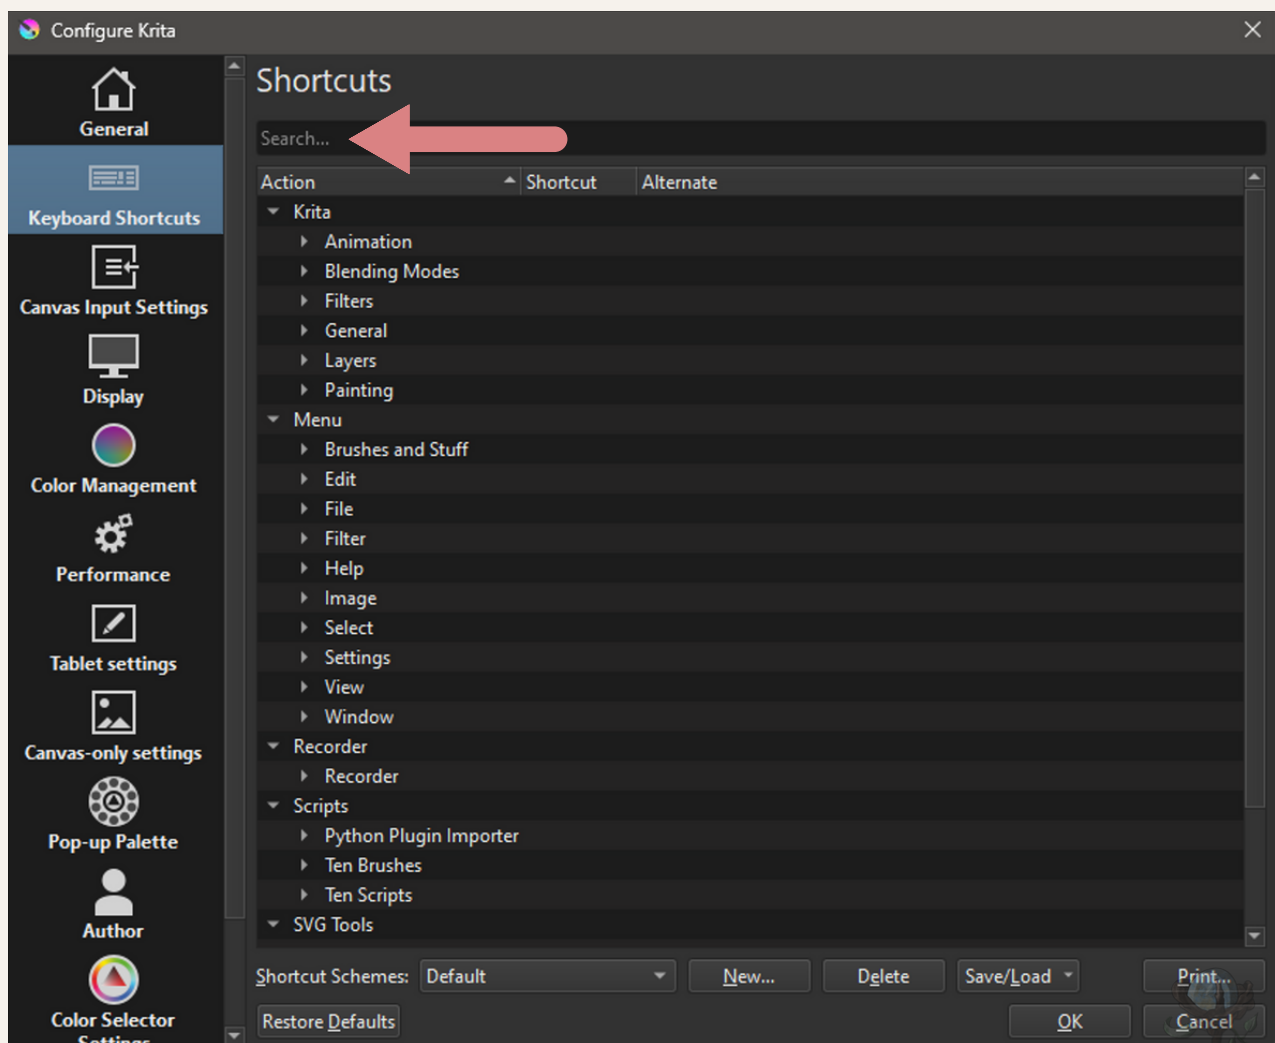

Close up of the search bar:

FINDING SHORTCUTS IN KRITA

Finally, to find all the default shortcuts in Krita, go to **SETTINGS**, and choose **CONFIGURE KRITA**.

Use the search bar to find a particular shortcut, or just go down the list. All the shortcuts are organized into sections.

Done!
